MEETINGS 2021-2022

GECOS has encourage its researchers to have meeting to address research projects. The number of meetings has been 688 meeting in the two years period, that means that is once a month.

SOFTWARE AND DATABASES ACCESS 2021-2022

Thanks to GECOS its researchers' members have some research software available.

- **STATA**

Stata is statistical software for data analysis. It is a complete, integrated software package that covers a wide range of data science needs. These include data manipulation, visualization, statistics and reproducible reports.

- **STAT/TRANSFER**

Stat/Transfer is a software designed to simplify the transfer of statistical data between different programs. It provides an extremely fast, reliable and automatic way to move data and preserves all of the precision in the data, while minimizing the size of the output data set.

The access to quality databases to carry out research is another achievements that GECOS got for its members.

- AMADEUS (since 2022 ORBIS Europe)

Amadeus is a comprehensive database of around 21 million companies, both public and private, across 44 Eastern and Western European countries. This BvD database combines information from over 35 sources with software for searching and analysis. One of its strengths is that the information is presented in a uniform and standardized format, which provides a realistic representation of European company accounts and enables cross-border search and analysis.

- EIKON

Eikon is a useful tool for analysing financial-market data and for gaining access to company fundamentals. A powerful feature of Eikon is the Excel functionality, which allows researchers to access the platform and download data efficiently.

PHYSICAL FACILITIES 2021-2022

Except for the hired researchers that have a shared office, each GECOS researcher has its own office in the FES building at Campus Miguel de Unamuno. Additionally, GECOS members have all the room facilities of the building for the meetings and other activities undertaken.
